

MODEL #9002
SMART TORCH SERIES

Smart Torch Pro

warnings

- Do not touch flame guard while in use or until sufficient time has passed for cooling.
- Do not immerse heated parts or items in water - allow to cool naturally.
- Use only butane gas in the Smart Torch Pro. Do not use propane gas or any other types of fluids.
- Do not unscrew the button in the gas tank base.
- Do not store in temperatures exceeding 104°F.
- Keep the Smart Torch Pro out of the reach of children.
- The flame of the Smart Torch Pro is nearly invisible in bright light or sunlight.
- Keep the Smart Torch Pro away from eyes at all times.
- Make sure that the gas flow is turned off when not in use.

instructions

- Read all warnings and instructions before using the Smart Torch Pro.
- To fill the gas tank, turn the Smart Torch Pro upside down and firmly push the butane can into the filling valve. The gas tank should fill in approximately 10 seconds. Allow the butane to stabilize for a few minutes before igniting.
- To ignite, press the ignitor button. The kill switch will automatically pop out upon pressing the ignitor button.
- To shut off, redepres the kill switch.
- To adjust the flame, increase the gas flow and flame length by turning the gas flow control knob in a counter-clockwise direction. The flame size, length and temperature may be adjusted by turning the air control valve in either direction.
