

### LIMITED ONE (1) YEAR WARRANTY

If your Iso-Tip tool fails to operate satisfactorily within one (1) year from the date of original purchase or receipt as a gift, Iso-Tip will at our option, repair or replace it and return it to you. Our warranty does not cover worn out parts. Please call first to receive an authorization code and then mail this tool with a note describing the defect and the date of original purchase or receipt as a gift with the authorization code (if in warranty) to:

Iso-Tip, A Division of Senasys.  
Attn: Returns  
704 Bartlett Avenue  
Altoona, WI 54720

Tools out of warranty will be repaired at our standard repair charges. This warranty is void and no repair or replacement will be made under this warranty or otherwise if:

1. The tool is modified in any manner.
2. The tool is repaired by anyone other than Iso-Tip.
3. The tool has been subjected to unreasonable use.

This warranty gives you specific rights and you may also have other rights which may vary from state to state. No other written express warranty is given. Any implied warranty which may arise from purchase or use is limited to the one-year period provided in this express warranty. Some states may not allow such limitation so it may not apply to you. No responsibility is assumed for incidental or consequential damages of any type or for the use of unauthorized attachments. Some states do not allow the exclusion or limitation of incidental or consequential damages so the limitation or exclusion may not apply to you. Warranty valid only in the United States.

**WARNING:** Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contain chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm. Some examples of these chemicals are lead (from lead based paint), crystalline silica (from bricks, cement, and other masonry products) and arsenic and chromium (from chemically treated lumber). Your risk from these exposures vary, depending on how often you do this type of work. To reduce your exposure to these chemicals, work in a well-ventilated area and work with approved safety equipment such as dust masks that are specially designed to filter out microscopic particles.
